SKILLS SUMMARY

• Languages:	C, C++, Python, SQL, DSA, Bash
• Frameworks:	HTML, CSS
• Tools/Platforms:	Wireshark, Nmap, Metasploit, Burp suite, Git, GitHub
• Operating Systems:	Windows, Linux
• Offensive Security:	Reconnaissance, Enumeration, Vulnerability Analysis, Web Exploitation, Privilege Escalation, Post-Exploitation, Network Penetration Testing
• Cloud Security:	AWS (EC2, S3, VPC, IAM, CloudTrail, CloudWatch), Cloud Monitoring, VPC Hardening, Identity Management
• Soft Skills:	Leadership, Problem-Solving, Communication, Adaptability

PROJECTS

Blinket Sales Data Analysis Github	Feb'2025-Jun'2025
- Cleaned and preprocessed Blinkit sales data, resolving missing values and inconsistencies for accurate analysis - Performed EDA and defined KPIs to identify trends across product types, outlet sizes, and locations - Built predictive models (Linear Regression, Random Forest, XGBoost) and evaluated performance using R² and RMSE. - Delivered insights on sales drivers and demand forecasting to support data-driven decision-making.	
Intelligent-Deadlock Detection-System Github	May'2025-Jul'2025
- Created a user-friendly tool to visualize and detect deadlocks using the Banker's Algorithm. - Automated detection of resource conflicts and visualized step-by-step resolution. - Developed solutions like process termination and resource preemption to resolve deadlocks. - Enabled import/export of resource data for easy scenario analysis and optimization.	

TRAINING

Ethical Hacking Virtual Internship EduSkills Academy Certificate	Jun' 03-Jul' 29
- Successfully completed an 8-week Ethical Hacking Virtual Internship through EduSkills Academy, gaining structured exposure to the cybersecurity domain and ethical security practices. - Built foundational understanding of ethical hacking and cybersecurity, including security concepts and approaches used to protect computer systems and digital assets - Developed knowledge of security vulnerabilities, cyber threats, and attack techniques, with an emphasis on understanding how weaknesses can affect system security. - Strengthened awareness of ethical security practices and defensive approaches, improving overall understanding of securing systems and networks against potential threats.	

CERTIFICATIONS

• Ethical Hacking	Edu Skills	Certification	July 26
• CompTIA Security +	CompTIA	Certification	Mar 26
• Aws Solutions Architect	AWS	Certification	Dec 26
• Quick Heal DFIR	Quick Heal	Certification	Dec 25
• CompTIA Network+	CompTIA	Certification	Jul 25

ACHIEVEMENTS

• Accomplished multiple learning paths on TryHackMe: Pre-Security, Security 101, Junior Penetration Tester, Web Application, SOC 1, Red Teaming , DevSecOps , TryHackMe Top 1%	Mar 26
• Solved 360+ rooms on TryHackMe, gaining hands-on expertise in penetration testing, web security, SOC operations, and network defense.	Mar 26

EDUCATION

• Lovely Professional University <i>Bachelor of Technology - Computer Science and Engineering</i> CGPA: 7.2	Punjab, India Since Aug 23
• Resonance Junior College <i>Intermediate – MPC</i> Percentage: 97%	Vijaywada, Andhra Pradesh Apr' 20 – Mar' 22
• Narayana E-Techno School <i>Matriculation</i> CGPA: 10.0	Dharmavaram, Andhra Pradesh Apr' 19 – Mar' 20
